DETAILED ACTION

This is in response to a letter for a patent filed on March 10, 2004 in which claims 1-12 were presented for examination. Claims 1-12 are currently pending.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

The information disclosure statement (IDS) submitted on 08/25/2004 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner. A copy of PTO-1449 is attached hereto.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 5-8 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

An invention, which is eligible or patenting under 35 U.S.C. 101, is in the "useful arts" when it is a machine, manufacture, process or composition of matter, which produces a concrete, tangible, and useful result.

The claim, as currently recited, appears to be directed to a system (see preamble), the body of the claim appears to be nothing more than software or computer-executable instructions. Without reciting a computer-readable medium having

Art Unit: 3628

said instructions embodied therein, said claim is considered to be directed to a non-statutory class of invention.

Conclusion

1. The following is an examiner's statement of reasons for allowance:

A) the prior art for example:

(1) Pilu (US PG Pub. 2003/0078863) discloses discount printing.

(2) Iwase et al. (US Patent Number 6,724,492), an image forming apparatus capable of performing trial printing and image performing system.

However, in regard to claims 1-4 and 9-12, the prior art does not teach or suggest specific manner in which the output image generating operation job is performed.

2. The examiner has cited prior art of interest, for example:

1) Zingher (US Patent Number 5,897,260), which discloses a print job allocation system.

2) Yoshinori (JP 2002183531), which disclose mail order sale method for commodity and its device.

Claim 5 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 101, set forth in this Office action.

Claims 10-12 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

3. The shortened statutory period of response is set to expire 3 (three) months from the mailing date of this Office action.
